## (1) ALFALFA

ALFALFA SHOULD BE INOCULATED.

### CAUTION!

Beware of unadaptable alfalfa from such states as Arizona, New Mexico, Texas and California and from South Africa masquerading under such names as "High Altitude", "Mountain Grown", etc. Alfalfa seed that is quite unsuited to our climate is being offered here under various fancy names. It is a poor bargain at any price.

## (2) MARKET CONDITIONS

The Farm Show last week in Harrisburg was highly successful. Retail prices were announced quite generally and farmers showed a keen interest in prevailing values.

The local dealer can profit by letting his customers know just what is available this spring and the prices.

If it is customary for you to announce your spring prices by mail we remind you that the QUAKER Seed Chart (shown on the outside of this price list) will cheerfully be supplied in quantity for you to send out with your early announcement. How many can you use to advantage?
